SUSTAINABILITY**

2017 REPORT

At the University of Washington

*Sustainability
is in our
Nature*

The UW Sustainability office is located on the Seattle Campus in **Gerberding Hall, room B40**. We're available Monday-Friday, 8am-5pm, to talk with you about sustainability efforts and how you can get involved. We're the central source for information and resources regarding sustainability practices and programs at the University of Washington.

 #sustainableUW

Meet our mascot, Sqwatch!

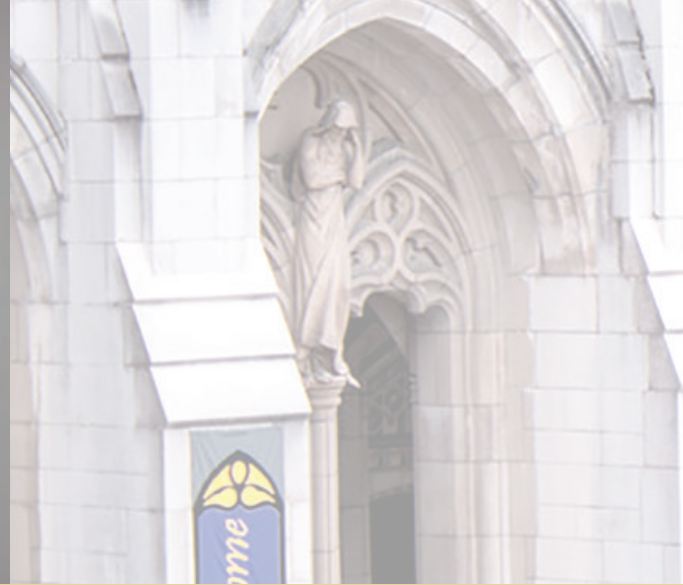

He's a sasquatch with a passion for purple-and-gold and a love of the environment. Even a bigfoot like Sqwatch knows how to leave a light footprint on the environment - and he's eager to help the UW community do the same. You might see him at events or hanging out around campus. The best place to look for Sqwatch is on our Instagram @sustainableUW

LETTER FROM THE CHAIR

Sustainability is a shared commitment at the University of Washington. Students, faculty and staff across all our campuses are working every day to create solutions to environmental challenges, both in our backyard and across the globe. As Chair of the Environmental Stewardship Committee, I am continuously impressed at and inspired by the innovation happening across our campuses.

The path toward our future involves meeting the needs of people while seeking ways to reduce our consumption of non-renewable resources. Now more than ever, UW is committed to continuing our leadership on this front. We are a global research university, making exploration and discovery core to our values. Sustainability is in our nature. It is who we are.

UW leadership is key to our progress, and I look forward to working with **Jeff Scott**, our new Executive Vice President, Finance & Administration, who will oversee the UW Sustainability office under the supervision of **Barbara Wingerson**, Associate Vice President & Chief of Staff.

I would like to take this opportunity to also thank **Ruth Johnston**, who transitioned into her new role as Vice Chancellor of Planning & Administration for UW Bothell earlier this year, for her work and dedication to UW Sustainability. Since starting the Sustainability office in 2008, she has worked tirelessly to support UW's commitment to a sustainable campus community and has gained national recognition from our higher education colleagues across the country.

Sustainability benefits us all. This report is a chance to share UW's sustainability stories and milestones, and highlight the culmination of effort, passion and perseverance of all of us here at UW.

Best,

A handwritten signature in black ink that reads "Lisa Graumlich". The signature is fluid and cursive.

Lisa Graumlich
Dean, College of the Environment
Chair, Environmental Stewardship Committee
Mary Laird Wood Professor

UW ACCOMPLISHMENTS

Named on the Princeton Review's Green Honor Roll, which recognizes schools that earn a perfect score on the company's Green Rating system for sixth consecutive year.

Achieved a second Gold rating on the Sustainability Tracking, Assessment & Rating System (STARS), a transparent, self-reporting framework for colleges and universities to measure their sustainability performance.

UW Bothell received the 2017 Sustainability Award in Facilities Management from the professional organization for educational facilities managers, APPA.

UW Tacoma offers one of the nation's first bachelor's degrees in Sustainable Urban Development, and has many other programs for students interested in sustainability, including Environmental Science, Sustainable Urban Development, and the Milgard School of Business's Center for Leadership and Social Responsibility.

The new West Campus Utility Plant (WCUP) received an Envision Gold award from the Institute for Sustainable Infrastructure (ISI), the first certified Envision Gold building to be certified at any college or university.

Featured by the Association for the Advancement of Sustainability in Higher Education (AASHE) as a top performer in the 2016 Sustainable Campus Index. The UW was recognized as a top-5 university in the categories of transportation and food & dining, as well as a featured highlight for investment practices.

The UW's Livable City Year program, launched in 2016 with UW Sustainability as a collaborative partner, connects UW faculty and students from all three campuses with a local community for a full academic year to work on projects relating to the community's goals around livability and sustainability. For more information visit LCY.uw.edu.

UW Medicine is recognized as a sustainability leader in healthcare. Two UW Medicine hospitals, UW Medical Center and Harborview Medical Center, are regularly honored with Practice GreenHealth's Top 25 Environmental Excellence Award, recognizing the 25 health care facilities across the county that best exemplify environmental excellence.

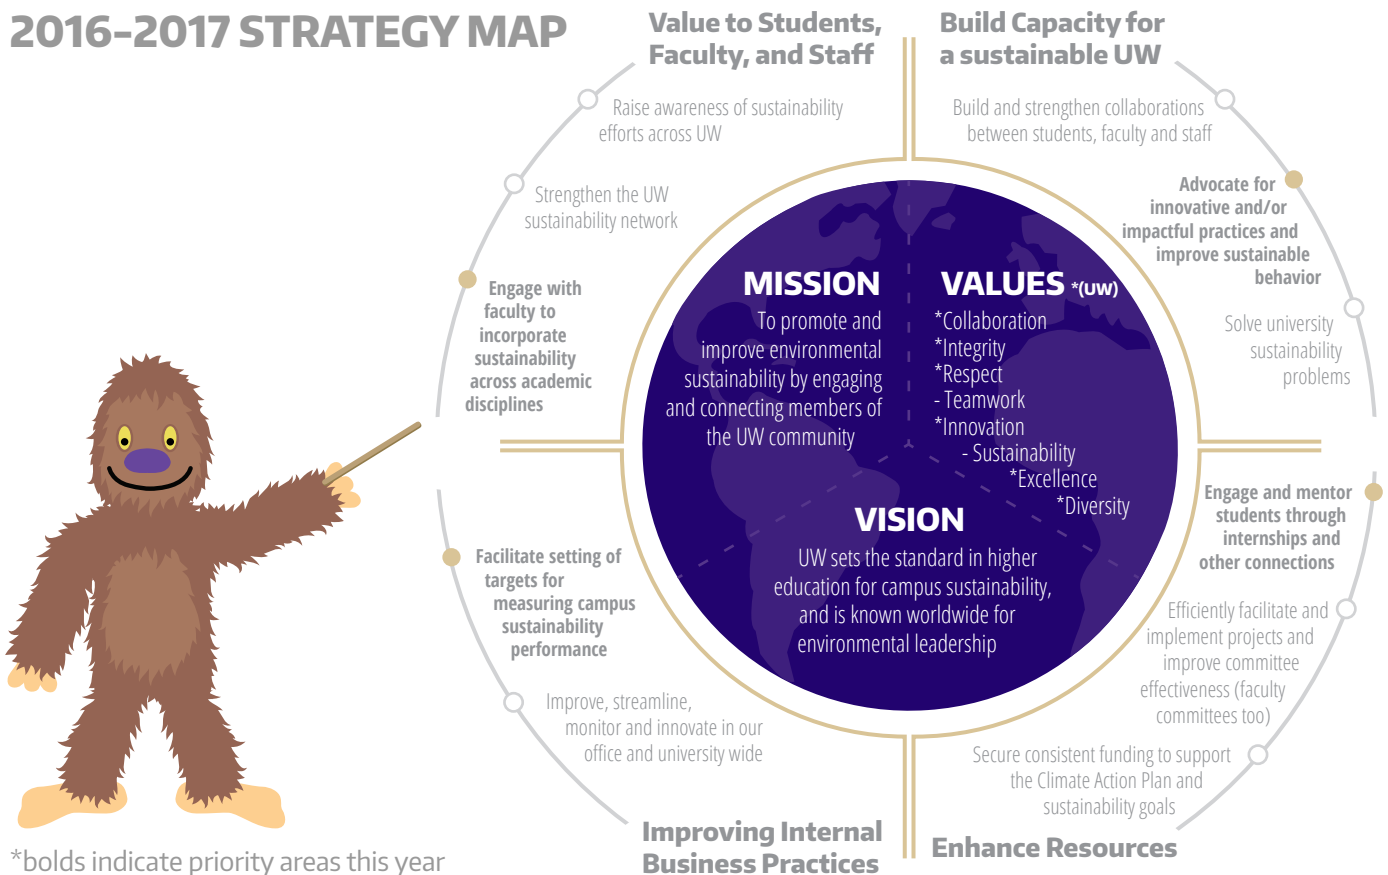

UW SUSTAINABILITY

UW Sustainability supports the Environmental Stewardship Committee (ESC), facilitates implementation strategies for the Climate Action Plan (CAP) and oversees the student-led Campus Sustainability Fund (CSF). As a learning laboratory, we coordinate behavior change programs that help reduce UW's environmental footprint and expenses, such as Green Certifications for offices and laboratories, paper reduction and green team support. We coordinate institutional data for the UW Sustainability Dashboard and external reporting agencies and track performance on campus sustainability.

Our office works to help the UW maintain its national leadership position in campus sustainability by coordinating responses to awards and reports. Our engagement programs include organizing the annual SustainableUW Festival and mentoring students in event management with the campus-wide Earth Day celebration. This year, UW Sustainability was a collaborating partner for the UW Livable City Year program (LCY.uw.edu) and hosted freshman seminars with First Year Programs to encourage sustainability practices.

For more information, visit green.uw.edu or contact us at sustainability@uw.edu

2016-2017 STRATEGY MAP

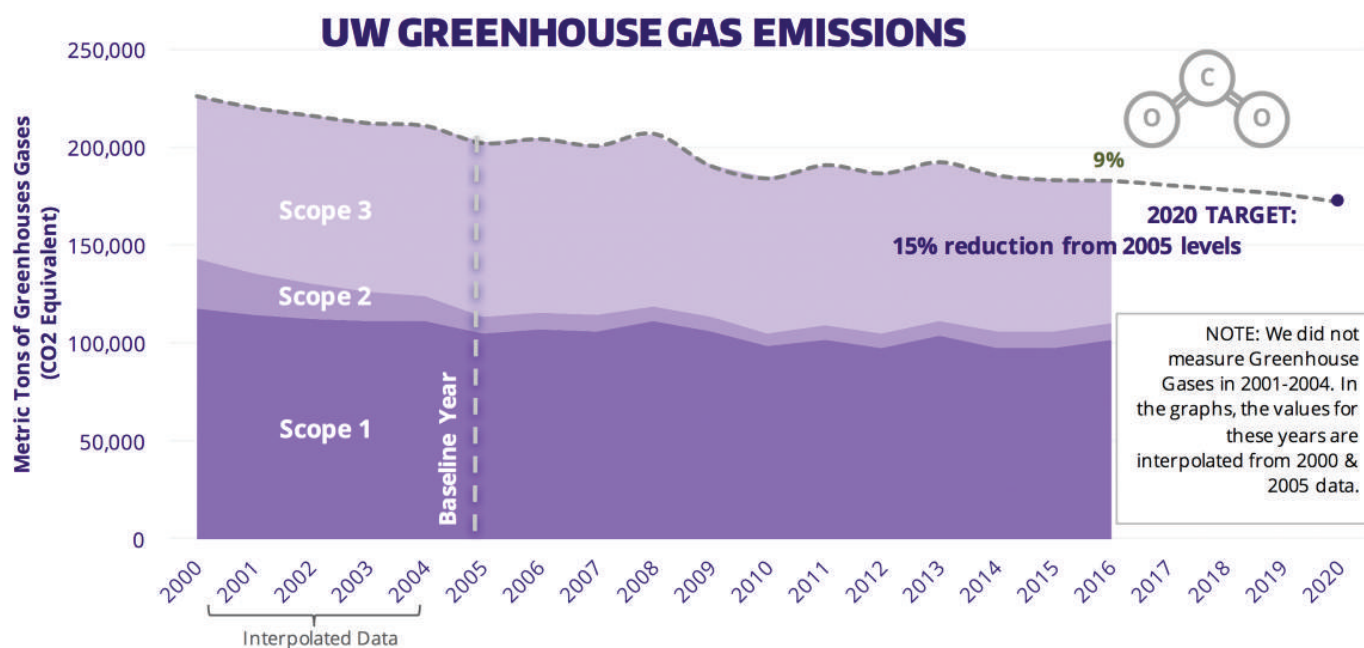

CLIMATE ACTION PLAN (CAP)

The University of Washington is a charter signatory to the American College & University Presidents' Climate Commitment (ACUPCC), and is committed to developing an institutional action plan to become climate neutral. In January 2009, under the auspices of the Environmental Stewardship Advisory Committee, a Climate Action Planning Oversight Team formed to create a Climate Action Plan, which describes preliminary strategies UW will explore, including our intent to work toward climate-neutrality.

The UW is working towards meeting the first emissions goal, a 15% reduction from 2005 levels, by 2020. Recently, student research teams created a more accurate method of calculating emissions for travel taken on behalf of UW, as well as recommendations for ways to cut those emissions.

UW has committed to reducing greenhouse gas emissions from 2005 levels

15%
BY 2020

36%
BY 2035

ENVIRONMENTAL STEWARDSHIP COMMITTEE (ESC)

The UW Environmental Stewardship Committee provides recommendations for University policies and oversees progress towards meeting the goals of the UW Climate Action Plan. In 2016-2017, the ESC members identified a number of priority items and formed working groups to address them, including development of Green Building standards, Greening Health Sciences at UW, strategic communications for the ESC, and identifying key performance indicators.

INSPIRING CHANGE

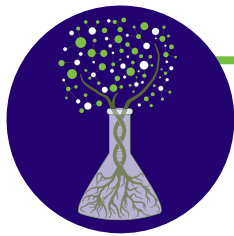

REDUCING OUR FOOTPRINT

UW Sustainability's Green Certification programs reduce the environmental impact of various spaces across campus by educating students, faculty and staff about sustainable practices, providing resources and recognition to offices and labs. Information on all Green Certification programs can be found at green.uw.edu/green-certification

GREEN OFFICE

The Green Office Certification program has promoted sustainable practices in workspaces at UW since 2011. All staff, faculty and students at UW can initiate the office certification process. green.uw.edu/green-office

GREEN LAB

The Green Laboratory Certification Program recognizes laboratories at UW that operate and behave sustainably within their laboratory space. Using roughly four times more energy than office spaces of the same size, laboratories have an enormous impact on a university's energy use. green.uw.edu/greenlab

GREEN RSO

UW Sustainability is piloting a Registered Student Organization (RSO) green certification, launching in Fall 2017, to encourage student organizations to adopt green practices.

PAPER REDUCTION

The Paper Reduction Program works to reduce paper consumption and save money across the University of Washington. The UW is committed to reduce the amount of paper used, while also utilizing 100% recycled paper when printing is necessary.

Paper Reduction Pros is a program that gives recognition to those who make significant and conscious efforts to considerably reduce the amount of paper they use, as well as people who educate their peers in paper reduction.

UW's Paper Reduction committee has worked with campus groups including Records Management and Procurement to create campus policies and educational materials including videos. Learn more: green.uw.edu/paper-reduction

WASHINGTON

E

NM

EVENTS

We organize and support campus events throughout the year, as well as helping to promote other UW events and external collaborations. We organize the annual SustainableUW Festival in October and work with students to support the UW Earth Day celebrations in April.

EARTH DAY

The UW Earth Day celebrations bring students, faculty, staff and community members together to celebrate the environmental stewardship and sustainability efforts across our UW campuses. More information: green.uw.edu/earth-day

SUSTAINABLEUW FESTIVAL

The SustainableUW Festival highlights sustainability efforts across the University of Washington. UW Sustainability partners with departments, student groups and organizations to present events at all three University of Washington campuses during the festival, which takes place in October as part of National Campus Sustainability Month. More information: green.uw.edu/festival

CONFERENCE PLANNING COMMITTEES

UW Sustainability staff contribute to the planning of several regional and national conferences, including the Washington Higher Education Sustainability Conference (WAHESC) and Smart & Sustainable Campuses Conference (SSCC), and served on the National Association of College and University Business Officers (NACUBO) Sustainability Advisory panel.

Visit green.uw.edu/events for a full list of sustainability events held by academic departments, student groups and other organizations across the University of Washington all year long.

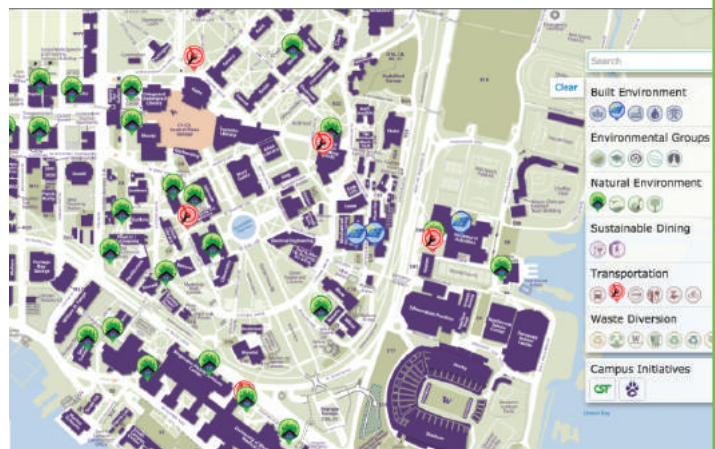

RESOURCES

The UW Sustainability website green.uw.edu is your source for information about sustainability programs and efforts across the University of Washington.

SUSTAINABILITY DASHBOARD

Our dashboard displays information on the University's sustainability performance in more than a dozen categories, including greenhouse gas emissions, waste diversion, energy use and many more.

green.uw.edu/dashboard >

SUSTAINABILITY MAPS

Our online interactive sustainability map provides information on many campus sustainability features, and our self-guided sustainable campus walking tour provides a more in-depth look at some highlights.

Search for projects related to sustainability or conservation practices, or submit your story!

green.uw.edu/snapshots

TAKE THE PLEDGE

Are you committed to acting sustainably? Take the pledge and show your commitment to saving energy, promoting sustainable food, conserving water, protecting green space, increasing recycling, and/or reducing reliance on polluting modes of transportation.

green.uw.edu/pledge

STUDENT WORK

Students are the lifeblood of the University. The UW provides many opportunities for students to study, observe and implement sustainability on and off campus. UW Sustainability regularly works with students on capstone and other research projects. We also engage student workers and volunteers in our programs and office operations.

STUDENT GROUPS

There are dozens of active student groups at UW who focus on aspects of sustainability and the environment. Get involved on campus and find the right group for you at green.uw.edu/rso

EcoReps is a student-run organization that works to make the UW a more sustainable university in collaboration with UW Sustainability. EcoReps connects students with ideas to people who can make them happen, and students who volunteer with environmental projects. green.uw.edu/ecoreps

Exploring Sustainability Seminar Series

UW Sustainability offers a quarterly undergraduate seminar series through First Year Programs that gives students the opportunity to explore sustainability at UW and beyond. Each quarter focuses on a different topic, including sustainability resources, sustainability-related academic programs and degrees, and how students can make more sustainable choices in their personal and professional lives.

The **Green Greek Representative Program** was developed to promote sustainability and environmental awareness within the Greek Community, to improve the environmental outcomes of Greek chapters, and to act as a network for Greek-wide “green” activism.

CAMPUS SUSTAINABILITY FUND

The **Campus Sustainability Fund (CSF)** provides grants for students to create on-campus sustainability projects. The CSF is student-funded and student-run, with all grant decisions made by the student CSF committee. Students can apply for a large grant during two funding rounds each year in the Fall and Spring, or apply anytime for small grants of less than \$1,000. For more information, email uwcsf@uw.edu or visit csf.uw.edu

Mission Statement

Our goal is to create a sustainable campus & foster an environmentally conscious university culture by funding student-led projects that lessen the University's environmental impact.

CSF staff and committee members accept their Husky Green Award during the 2017 Earth Day celebration.

23 PROJECTS IN 2016-2017

- 2017 TSA Night Market Recycling
- Apiary for the UW Farm
- EcoReps Solar Table
- Electric Bicycle Mail-Delivery
- Floating Wetlands Phase II
- Greek Community Energy Challenge
- Interactive Biogas Food Cart
- Keraton Going Green
- ReThink Resilience Summit 2017
- Solar Powered Phone Charging Stations
- UW Bicycle Library: Cycle Pack
- Biodegradable Pots - Replacing agricultural and horticultural plastics on campus
- Friday Harbor Labs Composting Facility: A home for our Rocket 700 composter
- Increasing drought tolerance of campus lawns with endophytes
- Replacing Chemical Fertilizers with Compost, Compost Tea, and Biosolids
- Surviving Catastrophe: Public Health and Solidarity in an Era of Climate Change
- University of Washington Sustainability Action Network (UW-SAN)
- University of Washington Campus Sustainability Challenge: Feasibility and Design
- UW-Solar Life Sciences Building Photovoltaic Implementation
- Pairing UW Food Waste with Non-Profit Agencies in Need
- Dual Flush Toilets at Women's Odegaard Restrooms
- Earth Day Band: Improvisational Music Project (IMP)
- Sustainable Learning Space

GREEN-UP PARTNERSHIP UW & SEATTLE CITY LIGHT

The University of Washington and Seattle City Light created a partnership through City Light’s Green Up program to advance renewable energy on campus and beyond. The partnership provides funding for renewable energy work at UW, allowing the University to develop renewable energy projects, produce educational outreach materials, and create opportunities for faculty and student collaboration.

BUILDING INFOGRAPHICS

As part of the partnership, UW Sustainability (with support from UW Facilities) has produced a series of posters that show how buildings on campus use utilities (water, electricity, steam, cooling, sewage). The displays have a building-specific informational poster, along with a series of five posters detailing the source of the utilities used by the University of Washington.

SUPPORT

UW Sustainability would like to thank the Class of 2017 for establishing the Sustainable Legacy Fund as their senior class gift. Ongoing revenue from this gift will provide support for UW students to pursue renewable energy technology with the support of UW Sustainability. This gift will support expanding solar energy on campus as well as other renewable energy projects. For information visit green.uw.edu/asap

In 2008, the senior class chose to make their gift an endowment to support the efforts of the Environmental Stewardship Committee (ESC). Their intention in establishing the endowment was to demonstrate the values held by the class while helping UW become a greener school and more beautiful place. To have the largest impact possible with these funds, the ESC has used this fund to support the Husky Green Awards.

The Husky Green Fund supports projects and initiatives that advance the University's sustainability goals. To donate, visit green.uw.edu/support

green.uw.edu
